

Manipulatives

You can find all, or most, of the materials I showed on the video at the dollar tree.

Math

- Addition, subtraction, multiplication, and division flash cards- with these, I just grabbed what I saw. There are some with characters on them, and depending on the child, I would grab those. If there weren't any character ones, I just grabbed what I saw.
- The number, color, and shapes flash cards- I did the same thing I did with the other flash cards above.
- Manipulatives- you may not be able to find the counting bears or connecting squares here, however, there are many other things you can use that can be found at the store. For example, mini legos can be found in the toy section, pom pom balls can be found in the craft section, clear/regular rocks can be found in the craft or garden section, candy can be found in the food section. All these things can be used for counting, addition, subtraction, multiplication, division, patterns, sorting, etc.

Language Arts

- There were no particular names or brands I found here I just looked in the teacher section, or the coloring book section near the toy aisle, and grabbed what I saw. I found word flash cards and books here.
- Some of the sight words flash cards I found on Amazon, but the others I found at the Dollar Tree.
